SOFTWARE ENGINEER

The Netherlands · mc.vermeer@hotmail.nl · mikevermeer.dev · LinkedIn · GitHub

MV

## PROFILE / 01

Software engineer working across web products, backend systems, automation, developer tooling, and applied AI. I translate operational problems into dependable software, with a focus on maintainable architecture, clear trade-offs, and the details that make systems useful in practice.

## EXPERIENCE / 02

NOV 2024 - PRESENT / ZWOLLE · HYBRID / FULL-TIME

### Software Engineer · Seeders

Building internal tooling, automation, and product features for Seeders Studio and operational workflows.

- Develop and maintain Laravel and PHP features with Livewire and Filament.
- Build automation pipelines that structure operational data and reduce manual work.
- Collaborate on architecture and system design, and perform code reviews for junior colleagues.

FEB 2023 - JUL 2023 / ZWOLLE · ON-SITE / INTERNSHIP

### Software Engineer Intern · CARD Solutions

Contributed to the development and maintenance of PHP and Laravel web applications in a professional engineering team.

- Learned and applied new technologies quickly while contributing to team and process improvements.

## SELECTED WORK / 03

### SEO intelligence for a global enterprise client PROFESSIONAL · CONFIDENTIAL

Custom analytics and automation tooling that integrated third-party data, processed large datasets, and produced structured insights for reporting and planning.

### EasyHotkeys SWIFT · MACOS

Native productivity utility with global shortcuts, clipboard-free text insertion, and Keychain-backed password snippets.

### NoSleep SWIFT · IOKIT

Menu-bar power utility with separate system and display assertions, timed sessions, battery safeguards, and tested state behavior.
